

Real-time Risk, Compliance & Competency for Ports around the world.

Sysmax check, proves and benchmarks compliance, risk and competency in organisations where adherence to best practice is critical to meet key standards. Empowering every worker at every level to be safer and more productive, by placing best practice in their hands and checking it is correctly used at all times and places. Protecting personnel and stakeholders 24/7.

Ensure personnel are efficient & safe

- › A role-based digital library of training, best practices & compliance checks.
- › Live remote support drives continuous improvement using any file (video, Office, pdf etc.).
- › Allows digital sign-off for the demonstration of personnel compliance.
- › Encourages adherence to best practices across the entire organisation to build winning teams.

Customisable reporting to make better decisions

- › Provides at-a-glance real-time reports on individual, role and team compliance and competence.
- › Enables Managers & Supervisors to identify risk and compliance gaps at all organisational levels.
- › Provides role-based training to fill skill gaps and improve competency levels in the field.

AI Risk Management across the enterprise

- › By ensuring best practice is actively employed, any failure to use best practice exposes risk.
- › Encourages active use of best practice, changes cultures and drives performance improvement
- › AI prediction of where the next loss incident is likely to be and fixes the problem before it occurs by deploying the right best practice and ensuring it gets done.

KEY FEATURES:

- › Any language
- › Evidence capture
- › Risk Reporting
- › Expiration alerts
- › Any device
- › Digital sign-off
- › Report Generator
- › Access permissions
- › Online / Offline
- › Dual Review
- › Geolocation
- › Cyber secure

Trusted by the world's second largest food & drinks company

Case Study:

Increased Efficiency by 80% with Benchmax

Challenge: Maintaining operations during COVID-19

- › For a multinational corporation, being on top of standards across operations is vital. During Covid-19 up to 45% of trained staff were unavailable, as they needed to shield, self-isolate or recuperate from COVID-19.
- › This resulted in a need to recruit, train and ensure compliance with best practices and the capability of new hires, at an accelerated pace, to keep production lines running efficiently.
- › To maintain consistency and quality of product, the company needed to ensure existing standards were met. This included verifying all new personnel were using the appropriate best practices, trained and verified to the company requirements before being deployed onto the factory production lines.

Company snapshot

- › The second-biggest food manufacturer globally
- › Sells in 200 countries. Over 100 product lines. Revenue: \$65 billion+
- › Employees: 267,000+
- › As of 2023, our system is being used across 11 of the company's operational countries, with nearly 8,000 users.

Solution: Benchmax reduced onboarding time by over 80%

- › By breaking procedures down into a series of verifiable steps, Benchmax ensured that supervisors could assess and verify the capability of line workers at pace, at the point of execution or remotely.
- › Workers were able to read and sign off understanding of all required SOPs, SWPs and key technical documentation, pertinent to their roles.
- › As a result, the company reduced the time for people to be verified as trained, safe and capable from 10 weeks to two.
- › Reducing the upskilling time by 80% enabled the production lines to keep operating at peak efficiency during the most demanding period in the history of the plants.
- › Benchmax continually monitors the compliance and capability lifecycle of all staff and automatically reschedules new checks when appropriate. Ensuring continuity of compliance and competency across the workforce.
- › Learning in China passed on globally using videos of machine maintenance.

Compliance Management with Benchmax

“Provided structure, acceleration and visibility of new person onboarding that we have never had before.”
